

SWIM MIRROR CARE INSTRUCTIONS

This mirror is made of highly reflective polished aluminum. With just a little bit of care you can extend the life of the mirror significantly. Below you will find tips and suggestions to prolong the life of your mirror.

- 1.** The mirror must be removed from the pool every day, do not leave it in the pool overnight.
- 2.** Do not allow swimmers to remove mirrors without proper training or supervision
- 3.** Upon removal, rinse with fresh (non-chlorinated) water to remove any chemicals, then dry with a towel or soft cloth.
- 4.** Swim mirrors are are thin and pliable, and can be bent if not handled with care. Find a flat surface or narrow, upright area to store the mirror to retain its shape.
